

Lingyi Long

Email: longlingyi11@sjtu.edu.cn

Education

Shanghai Jiao Tong University (SJTU), Shanghai, China

Sept. 2023 – June. 2027

- B.S. in Software Engineering
- Major GPA: 88/100
- IELTS: 7.0 (Listening:7.5, Reading: 7.5, Writing: 6.5, Speaking: 6.5)
- Main Courses: Machine Learning(96%), Introduction to Computer System(91%), Advanced Data Structure (91%), Computer System Engineering(91%),Software Engineering Principle(94%), Application System Architecture (95%)

Research Experiences

Research on Linear Attention in Video Generation

Oct. 2025 – Present

Present Main Researcher | Mentor:Prof.Tao Huang (CS Department, SJTU)

- Purpose :Applying linear attention to video generation models
- Contribution : Based on the Wan2.2 model, replace the softmax layer of the model with gated linear attention.
- Effect :Reduce the resources required for model training, lower the computational load and memory usage.

Research on HCI for Storytelling

June.2026 - Present

Present Main Researcher | Mentor:Prof.Zhuran Lu (DASE, HKU)

- Purpose : Enable exploration and creation across interconnected canonical and fan-written stories.
- Contribution : Designed an LLM-powered system for cross-branch exploration, story-state comparison, and grounded What-If authoring.
- Effect : Built the full prototype and validated it through technical evaluations and user studies.
- Publication: Submitted to NeurIPS26 Creative AI

Research on HCI for Sports

May.2026 - Present

Present Main Researcher | Mentor:Prof.Xiaojuan Ma (CSE, HKUST)

- Purpose : Address information loss and miscommunication between coaches and athletes through an AI-mediated interactive system.
- Contribution : Requirement analysis, interface design, full-stack prototyping.
- Effect : Prototype built; user study planned.

Research on Time Series Prediction

Sept. 2024 – Mar.2026

Present Main Researcher | Mentor: Prof. Xiaofeng Gao (CS Department, SJTU)

- Purpose :Predict the usage of CPUs to achieve reasonable CPUs scheduling
- Contribution : Compare prediction performance and features of STDPS against baseline methods
- Effect :Integrate,system state, spatio-temporal graph neural networks, and non-parametric uncertainty modeling for cloud workload prediction and scaling.
- Publication: upcoming IEEE Transactions on Services Computing

Internet platform development and maintenance

July. 2025 – Jan.2026

Researcher | Mentor: Prof. Beijun Shen (CS Department, SJTU), Rui Ren (CS Department, SJTU)

- Purpose: Develop secure and advanced internet products
- Contribution : Participate in both front-end and back-end development

- Effect : Set up a website for farmers' group buying cooperation.

Scholarships

Zhiyuan Scholarship (20%)	2024/2025
Academic Excellence Class C Scholarship (30%)	2024/2025

Honors & Awards

Honorable Mention in COMAP' s Mathematical Contest in Modeling Contest	2024
Excellent league member of SJTU	2025

Skills

Programming language: C/C++, Java, Python, JavaScript, HTML5/CSS3

Activities

Volunteer in Shanghai International Half Marathon	2025
Volunteer for the National Innovation and Entrepreneurship Competition	2024
Member of the Calligraphy Association in SJTU	2025
